Mohsen Piri

FrontEnd Developer

My name is Mohsen Piri and I am a responsible, punctual, and dedicated Frontend developer with over three years of professional experience in private and public companies. I am a good teammate and always strive to learn and improve my skills to achieve success in my career. I am looking for a remote job where I can contribute my expertise and skills to create amazing front-end experiences for clients. Throughout my career, I have worked with different startup and non-startup teams, which has given me valuable experiences and taught me the best practices for developing vue.js programs. I have also learned how to conduct effective code reviews and improve core web vitals, which can significantly impact SEO. I believe in the importance of diligence, and I am constantly looking for ways to enhance my skills and stay up-to-date with the latest industry trends. I am excited to bring my passion for front-end development to your team and contribute to the success of your projects. Thank you for considering my application.
